

Combined Peptide Supplier Due-Diligence Dossiers

Compiled from M01-M05 assessments

Includes WuXi TIDES, Sinopep-Allsino, Hybio, CPC Scientific/Medtide, and Piramal Pharma Solutions.

Executive Summary

M01 - WuXi TIDES / WuXi STA

Preliminary Tier B. Strong peptide API and fill-finish capabilities with significant regulated-market evidence, but material entity, certificate, quality-system, supply-chain and geopolitical risks require RFI and audit.

M02 - Sinopep-Allsino

Preliminary Tier B. Credible peptide API manufacturer with FDA inspection history and DMF activity; governance concerns and regulatory-document gaps require enhanced diligence.

M03 - Hybio Pharmaceutical

Preliminary Tier B. Notable evidence includes FDA-approved liraglutide product linkage, Wuhan API operations and CEP evidence, but quality-system and site-specific verification remain required.

M04 - CPC Scientific / Medtide

Preliminary Tier B. Credible API supplier with FDA and international inspection evidence, but 2024 FDA observations, unresolved 2026 PLI details and scope limitations require audit.

M05 - Piramal Pharma Solutions, Turbhe

Preliminary Tier B. WHO-prequalified peptide API evidence and regulated-market experience are strong, but FDA 2025 Form 483 findings and CAPA verification remain key gating items.

M01 - WuXi TIDES / WuXi STA

Preliminary Tier B. Strong peptide API and fill-finish capabilities with significant regulated-market evidence, but material entity, certificate, quality-system, supply-chain and geopolitical risks require RFI and audit.

Overall assessment: Suitable for RFI and audit, not unconditional qualification based on public evidence reviewed.

M02 - Sinopep-Allsino

Preliminary Tier B. Credible peptide API manufacturer with FDA inspection history and DMF activity; governance concerns and regulatory-document gaps require enhanced diligence.

Overall assessment: Suitable for RFI and audit, not unconditional qualification based on public evidence reviewed.

M03 - Hybio Pharmaceutical

Preliminary Tier B. Notable evidence includes FDA-approved liraglutide product linkage, Wuhan API operations and CEP evidence, but quality-system and site-specific verification remain required.

Overall assessment: Suitable for RFI and audit, not unconditional qualification based on public evidence reviewed.

M04 - CPC Scientific / Medtide

Preliminary Tier B. Credible API supplier with FDA and international inspection evidence, but 2024 FDA observations, unresolved 2026 PLI details and scope limitations require audit.

Overall assessment: Suitable for RFI and audit, not unconditional qualification based on public evidence reviewed.

M05 - Piramal Pharma Solutions, Turbhe

Preliminary Tier B. WHO-prequalified peptide API evidence and regulated-market experience are strong, but FDA 2025 Form 483 findings and CAPA verification remain key gating items.

Overall assessment: Suitable for RFI and audit, not unconditional qualification based on public evidence reviewed.
